It's Monday morning, the day is grey.
Why? Lilly isn't at school today.

What's wrong with her? Why isn't she here?
She may be late or is she ill? Oh dear!

Mike is anxious, he can't concentrate,
he takes a phone and dials six, eight...

nine, three, one, double four, five and two...
- Hello Lilly, it's Mike, how are you?

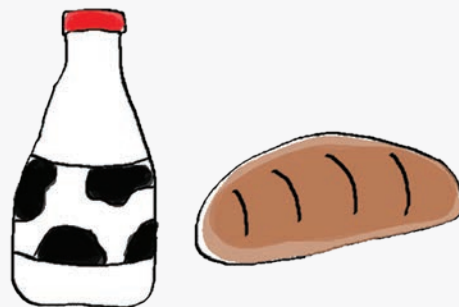

- Thanks Mike, but I am not really great.
I am ill, I've got flu, I'm afraid.

- Well, don't worry, you'll get better soon,
I'll visit you in the afternoon.

On Tuesday he buys some medicines, books and Lilly's favourite magazines.

On Wednesday Lilly is still in bed. Mike goes shopping, he buys milk and bread,

some yoghurt, cheese, ham and lots of fruit. Lilly loves them, they are really good.

On Thursday after school, you can guess, Mike goes to Lilly's to play some chess.

On Friday Mike makes chicken and chips, especially for Lilly, with her favourite dips.

$$2 + (4 \cdot 2) - 7 = ?$$

On Saturday they are both busy, they do some Maths, it isn't easy.
